## EXPERIENCE

### Rayzer Business Technologies, Remote — Frontend Developer

AUGUST 2024 - PRESENT

Developed and designed responsive web applications using typescript, next js and redux with a focus on performance and scalability.

Optimized and refactored code for better performance using throttling and debouncing techniques.

Utilized git for version control, participated in code reviews, and followed agile methodologies.

Ensured cross browser compatibility and mobile responsiveness across all devices.

### KOONAGE INFORMATION TECHNOLOGY, Abuja — Frontend Developer

OCTOBER 2023 - DECEMBER 2024

Developed and designed responsive web applications using typescript, next js and redux.

Worked closely with backend engineers to integrate restful apis from the backend.

Utilized git for version control, participated in code reviews, and followed agile methodologies.

Ensured cross browser compatibility and mobile responsiveness across all devices.

### DOWELL RESEARCH UX LIVING LAB, United Kingdom — Backend Developer

SEPTEMBER 2023 - DECEMBER 2023

Designed and implemented robust server side architecture to support high performance applications.

Worked on the Dowell Team management App with other developers to ensure optimal performance and ensure code quality.

## SKILLS

HTML5/CSS

Javascript

typescript

Python

Django

React

React-native

Nextjs

Tailwind-css

Redux

OpenApiGenerator

Git

Nodejs

Mongodb

## Referees

Henry Egbe(Team Lead  
I-strata,  
+1(505)-518-1596,henryegbe07@gmail.com)

Elisha Benjamin(Team Lead  
Koonage Info Tech,  
malishben360@gmail.com,b

Implemented RestfulApis for seamless communication between the server side and client side application.

## **I-STRATA(MEDIA,DATA,TECH), REMOTE — Backend Developer**

MARCH 2023 - JULY 2023

Implemented and integrated third party Apis Such as paystack, Mailchimp, google news.

Implemented script using tools like beautifulsoup4, crawley to scrape the web for business news and also saved it in excel and csv format.

Conducted code reviews, identified bugs and also implemented the necessary changes to ensure code quality and maintainability.

## **LANGUAGES**

English

## **UZI-BEN NIG LTD, ASABA— Internship**

SEPTEMBER 2020 - JANUARY 2020

Installation and maintenance of Aio Systems.

## **UPWORK— Freelance Developer**

MARCH 2020 - Present

Worked with different clients to ensure quality deliverables on products and implemented different features on products.

Wrote efficient and well documented codes for various clients.

Timely delivery on projects and prompt communication.

## **EDUCATION**

### **Joseph Saurwan Tarka University, Makurdi, Benue State**

APRIL 2017- NOVEMBER 2021

B(ed) Statistics/Computer Education.

## **PROJECTS**

### **Hula**

Developed an e-commerce platform with two interfaces: a web-based admin panel for managing products, users, and orders, and a mobile app for customer shopping and engagement. The platform supports real-time updates, secure payment processing, and a seamless user experience across devices.

## **Geo Clockin**

Developed a mobile app for managing staff attendance with geofencing capabilities. The app tracks employee check-ins and check-outs based on location, ensuring accurate attendance records within defined geographical boundaries. It also includes real-time notifications and reporting features for better workforce management.

## **Dowell Team Management App**

Developed Task Management app, developed by UX Living Lab, is designed to streamline your workflow and enhance productivity. With features such as task creation, organization, assignment, and insightful report generation, it simplifies project management and boosts team collaboration. Experience seamless project tracking and improved efficiency with our user-friendly, powerful tool.

## **Dambo**

This system includes three interfaces: two web interfaces (one for admins and one for contractors) and a mobile app for clients. The mobile app enables clients to request drilling services, while the contractor interface allows contractors to accept and manage these requests. The admin interface oversees the entire operation, ensuring efficient coordination and project execution across all parties involved.
